Communication systems

Control in your hands.

IW Manager

Control and management software developed by the R&D&i department for ISTOBAL vehicle-wash equipment. The **IW Manager** communicates the elements in different facilities and controls equipment operations in a centralised and efficient way. Access is gained from any computer or mobile device.

- Remote control of facilities.
- Direct vehicle views following camera installation.
- Warning handler.
- Alarm configuration by *e-mail*.
- On line *technical service**.
- Statistics**.
- Adequate for rollovers and jet washes.

*On line *technical service*

The **IW Manager** provides direct Technical Service access to maintenance and configuration screens for *on-line diagnosis and service*. This tool enhances response and allows car wash facilities to be simultaneously connected.

**Statistics

Details on number of washes, takings per month, day and hour just by clicking on the start screen.

Screen Access

Software for remote access to the command post of a car-wash machine.

Screen Access displays all the information on the programme of Siemens KTP400 touch screen to the technical staff, allowing them to interact with it.

- Machine control and diagnostics.
- Access to configuration menus.
- Partial and total counters.

This application uses the VNC (*Virtual Network Computing*) connection and is compatible with JAVA web browsers. It can be used with the M'NEX and M'START rollover ranges and in the HEAVYWASH commercial vehicle range.
